

Hello everyone!

Just completed module 1 of the DIGITAL WORKPLACE program, we propose in this forum the following articles, so that you can go deeper into everything we have worked on. Read them carefully and then, individually:

- Point out which aspects have caught your attention most especially.
- Identify the 3 application areas in which you recognize that you should work harder (or upgrade) to improve your personal development in this competition.

If you can add some personal experience or learning that you want to share with your fellows, go ahead! Likewise, if you want to add some video and / or article that reinforces the concepts worked, surely it will be of great use to all.

(Proposed articles, or similar)
