

Hello everyone!

Just completed module 2 of the DIGITAL WORKPLACE program, we propose in this forum the following articles, so that you can go deeper into everything we have worked on. Read them carefully and then, individually:

- Point out which aspects have caught your attention most especially; Have you worked on any of them or do you plan to do it? Identify 3 areas of application to improve your personal development.
- Share some experience or personal situation that has helped you to improve your communication skills and that you think can help others.
- If you know any video and / or article on this topic, share it!

We look forward to your contributions!

*(Proposed articles, or similar)*
